PROJECTS

FIZZBEE |

React, Node, Express, Axios, Material-UI

A customisable music player using Spotify Web API and SDK (Note: Spotify premium is needed).

- Have implemented the YouTube API too, one can enjoy the music video on the same player,
- Used useContext to pass data through the component tree and useReducer for state manipulation and transition.
- Have added multiple layouts of the player to switch into.
- Implemented react-speech-recognition, hold a button and speak the song name you want to play.
- Added skeleton animation as a loader.

PORTFOLIO | Freelance Project |

React, Firebase, Material-UI, aos, email.js,

compressor.js

A web app for a client to showcase her skills and artwork.

- Added a Gallery with slideshow and form.
- Has a separate admin section for my client to upload images and edit the homepage.
- Implemented compressor.js to compress image before uploading.
- Implemented Email.js to the contact form so all the messages go directly to her email as well as to the firebase database.

OPINION POLL |

React, Node, Firebase, Material-UI, socket.io,

passport.js, bcrypt.js

A real-time app where users can create anonymous polls.

- Added Snackbar for notification.
- Has form Input-validations.
- Has Dynamic form fields.
- Added QR-code and other social share options to share your poll.
- Used redux store to persist user data.
- Used firebase so voting is all real time.
